

ICIW 2010

5th International Conference on Information Warfare & Security
The Air Force Institute of Technology,
Wright-Patterson Air Force Base, Ohio, USA
8-9 April 2010

CALL FOR PAPERS, PANELS and TUTORIALS

Mini track on **Mission Assurance**

Track -chair:

Dr Michael Grimaila
Air Force Institute of Technology

Virtually all organizations have embedded information technologies into their core processes as a means to increase operational efficiency, improve decision quality, and reduce costs. This dependence can place the mission at risk when the loss of a critical information resource occurs. Risk assessment and situational awareness are essential to responding to a cyber crisis, as is the consideration of what missions are affected, potential cascade effects, and prioritization of restoration activities.

This track focuses upon current or proposed methods, tools, and technologies that can be deployed to improve mission assurance.

Topics of interest to this mini-track focus include, but are not limited to:

• Mission assurance	• Mission dependency analysis
• Mission risk analysis	• Mission impact assessment
• Mission representation	• Military decision making process

To submit an abstract/paper for this mini track, please read the submission details on the [call for papers](#) page.

Important dates

Abstract submission deadline:	17 September 2009
Notification of abstract acceptance:	24 September 2009
Final copy of full paper due for review:	5 November 2009
Notification of paper acceptance (with any requested changes):	14 January 2010
Earlybird registration closes:	1 February 2010
Final paper due (with changes):	15 February 2010
Final author registration date:	4 March 2010
