Call for papers, workshops and tutorials

Mini track on Social Capital.

Track chair: Tjip de Jong, University of Twente The Netherlands

Social capital in the form of networks of trust has value for individuals, teams and organisations. It is an indicator for economic success, measurable through constructs like trust, reciprocity, shared norms and values. Social capital is a popular paradigm in organisational studies. The use of social capital theory in the fields of business studies has increased exponentially in recent times. It offers new insight in explaining organisational dynamics, knowledge sharing, learning processes and innovation. While there is an extensive body of knowledge on the benefits of social capital, less attention has been paid to understanding how and why social capital evolves within organisational settings. It is interesting to gain insights into why social capital changes and what the effect is on knowledge sharing, knowledge productivity, learning processes and innovation.

This brief description suggests a number of interesting research questions. We encourage papers that view social capital through individual, team, organisation or higher levels of analysis. In this track the following questions will be explored:

- How does social capital evolve in organisational settings?
- How does social capital affect knowledge productivity and innovation?
- What is the relation between social capital and learning processes?
- What is the role of trust in innovation and knowledge productivity?
- How can we built social capital and make it work to the organisational advantage?
- What factors enhance social capital and what factors inhibit social capital in organisations?

This track explicitly encourages both inter -and intra-organisational research on social capital theory.

Submission details:

Abstract details: The Abstract should be a minimum of 300 and no more than 500 words including up to five keywords and keyphrases to be received by **7 October 2008**. Please read the abstract guidelines section of the website before submitting.

Submission: Online at <http://academic-conferences.org/ecic/ecic2009/ecic09-abstract-submission.htm>
Please ensure that you complete all relevant sections of the form, including the conference track the abstract is intended for, the proposed title for the paper, the full names (first name and surname, not initials) and email addresses of all authors and a postal address and telephone number for at least one contact author. Please indicate clearly if the contact author is not the lead author..

Full paper: Only required when the abstract has been selected and not to be more than 5,000 words including abstract, keywords and references (the Harvard referencing rules need to be followed). Submission date will be no later than 25 November 2008. Papers should be submitted as .doc or .rtf file attachments by email to the Conference Manager, Elaine Hayne at elaine.hayne@academic-conferences.org

Important information:

The selection panel of the conference committee will consider all abstracts received by the submission deadline to ensure that the proposed paper is relevant to the Conference. The authors of abstracts, which describe a relevant paper, will receive a notification of abstract acceptance. All full papers will be blind reviewed by members of the conference committee to ensure an adequate standard, that the proposed subject of their abstract has been followed, that the paper is of a suitable length, that the standard of English is adequate and that the paper is appropriately referenced. Papers that are accepted will be published in the conference proceedings providing at least one author registers and presents the work at the Conference (see the registration section of the conference website for more information about registration). Due to the large number of papers expected for this conference, the committee only allows an author to present one paper. Therefore if multiple papers are accepted for presentation different co-authors need to present each paper.
