Call for Papers Posters Round Table Proposals Practitioner Contributions and Product Demonstrations

The International Conference on e-Learning (ICEL) brings together academic research and practical applications of e-Learning from all areas. ICEL brings together varied groups of people with different perspectives, seeking to bring top research and proven best practices together into one location, for the purposes of helping practitioners find ways to put research into practice, and for researchers to gain an understanding of additional real-world problems.

The conference committee welcomes both academic and practitioner papers on a wide range of topics and a wide range of scholarly approaches including theoretical and empirical papers employing qualitative, quantitative and critical methods. Action research, case studies and research-in-progress are welcomed approaches. [Research in progress](#), [case studies](#), [poster submissions](#), [proposals for roundtable discussions](#), [practitioner contributions](#), and [product demonstrations](#) based on the main themes are also invited.

A comprehensive list of topics for submissions can be viewed on the conference website at:
