Participative Research Methods in Tourism
Led by João Queiroz, Aga Khan Foundation, Portugal

This workshop addresses the methodological process of participatory diagnosis and creating the conditions for the participation of a given community (i.e., residents, technicians and professionals) in research. It focus the sharing, and subsequent analysis, of the perceptions and representations that a community has about experiences and living conditions and how it characterizes itself, taking into account collective identification (the neighbourhood, the place, the territory...).

Participatory diagnosis methods constitute the first step to compromise residents, technicians and professionals with the change they will carry out.

This workshop will help participants to develop skills in participative research, which are vital to community intervention, namely:

- Understand a reality given by the voice of those who live there, work or exercise their professional activity
- Promote collective action, seeking to ensure this way Processes of greater adequacy of projects and solutions.

João Queiroz has been Community Officer at Aga Khan Foundation since 2004. He has a degree on Social and cultural communication. He was also lecturer at the Portuguese Catholic University, Lisbon and development education officer at a Development NGO.
