

ECKM 2022

23rd European Conference on Knowledge Management
2-3 September 2022, Naples, Italy

Mini Track on Knowledge Management Theories and Applications from Trans/Multi/Inter/Disciplinary Perspective

Mini Track Chair: Prof. Dr. Mustafa Sağsan, Cyprus International University. Northern Cyprus

One of the richest aspects of the knowledge management (KM) field is that it could be evaluated from an interdisciplinary, multidisciplinary and transdisciplinary perspectives. This feature of KM provides opportunity to the KM scholars to integrate KM topics with the other disciplines (like agricultural sciences, health sciences, applied sciences, educational sciences, philosophical debates, and etc.) as well as to collaborate with the other scholars who have different background apart from KM. The aim of this track is to allow researchers

whose background is different from or close to KM to share their knowledge and experiences, projects, blueprints, designs, outlines, proposal, reviews, and other scientific studies related to transdisciplinary, multidisciplinary and interdisciplinary perspectives. Theoretical and practical implications are invited but not limited in this track.

Theoretical, as well as practical contributions, are invited to this mini track. Potential topics include, but are not limited to:

- Agricultural Sciences Projects related to KM
- The Combination of Health Sciences Practices with KM
- Philosophical Debates in the context of KM Discipline
- KM Processes within the Applied Sciences Ventures
- Educational Sciences Proposals associated with KM Blueprints
- Applying KM Strategies in Social Sciences

Prof Dr Mustafa Sağsan is currently working at the Business Administration Department in Cyprus International University and is teaching some of the courses related to Knowledge Management and Organization Sciences. He is member of organizing committee of ECKM and ICICKM since 2009

Submission details
