ECKM 2022

23rd European Conference on Knowledge Management
2-3 September 2022, Naples, Italy

Mini Track on New Trends and Models of Knowledge Transfer in Digital Higher Education

Mini Track Chairs: Maria José Sousa and Joana Martinho da Costa, Instituto Universitário de Lisboa, Portugal

 In the sphere of higher education, there is an increasing interest in novel approaches, contexts, and technologies. This mini track intends to address current research and trends in all aspects of higher education in this regard.

It will serve as a global platform for the investigation and reporting of a wide range of issues affecting learning processes in higher education, such as learning innovations, new pedagogical methods, and new learning scenarios.

Authors are encouraged to submit research papers, case studies, and demonstrations that exhibit original scientific findings, methodological elements, concepts, and educational technologies. Theoretical, as well as practical contributions, are invited to this mini track. Potential topics include, but are not limited to:

- Digital Higher Education
- Technological Developments
- Innovations in learning
- New pedagogical methods
- Learning context

Maria José Sousa (Ph.D.) is a professor at ISCTE-Instituto Universitário de Lisboa, a research fellow at Business Research Unit. She is an expert in digital learning and digital skills, as she has assumed a Post-Doc position from 2016-2018 at Universidade de Coimbra. She has developed major research in the digital education field with articles published in high-level journals and is a guest-editor of more than 5 Special Issues from Springer and Elsevier. Currently she is the Coordinator of ATHENA, an Erasmus+ funded project created to improve university teachers' digital skills.

Joana Martinho Costa (Ph.D) is a researcher at ISTAR and invited assistant professor at ISCTE. She is certified by the Scientific and Pedagogical Council for Continuous Training, Portugal, and has been publishing her works in several journals indexed in Scopus and ISI Web of Knowledge in Educational Technology, Technology-enhanced learning, and Learning Environments. Currently, she participates in ATHENA, an Erasmus+ funded project created to improve university teachers' digital skills.

Submission details
In the first instance a 300 word abstract is required, to be received by **9th February 2022.** Please read the guidelines at
http://www.academic-conferences.org/policies/abstract-guidelines-for-papers/

Submissions must be made using the online submission form at
https://www.academic-conferences.org/conferences/eckm/eckm-call-for-papers/eckm-submission-topics/

If you have any questions about this track please email one of the mini track chairs: maria.jose.sousa@iscte-iul.pt; joana.martinho.costa@iscte-iul.pt See more about ECKM at https://www.academic-conferences.org/conferences/eckm/
