

ECIE 2023 Pre-Conference Workshop

20 September 2023

Universidade Portucalense, Porto, Portugal

14:30-17:30

UNIVERSIDADE
PORTUCALENSE

KEY TAKEAWAYS

- GET INSIGHT INTO WORKING STYLES OF POTENTIAL COLLABORATORS
- ALIGN YOUR PROJECT AIMS
- ROUGH-TEST YOUR PROPOSED HYPOTHESIS
- CONSTRUCT A SKELETAL RESEARCH GRANT PROPOSAL WHILE NAVIGATING UNCERTAINTY THROWN YOUR WAY BY INTRINSIC AND EXTRINSIC FACTORS

Rajiv Vaid Basaiawmoit, Ph.D., MBA, is the Head of Sci-Tech Innovation & Entrepreneurship at Aarhus University, Denmark. He is an award-winning Entrepreneurship Educator and works at the intersection between innovation, entrepreneurship, interdisciplinary-collaboration and gamification. He designs and embeds Entrepreneurship into curricular education. He is an invited speaker at many conferences and events around the globe and he has spoken on various well-known platforms such as TEDx, ECS and NATO-CoE.

GRANTED™

The Research Grant Game

Get autumn off to a flying start with a board game that helps you draft a skeletal research proposal with collaborators

Presented by

Rajiv Vaid Basaiawmoit, PhD, MBA
Aarhus University, Denmark

As the autumn semester gets underway, new calls for grant proposals are also released. Are you interested in getting into grant-writing mode with strangers (that could become your collaborators) using an entrepreneurial approach to grant-writing? Then this workshop is something for you to join.

Come with an open mind. Find someone you have not interacted with earlier and form a team together (min. 3 people per team and max of 4). Maybe you have interacted with someone already or discussed a project proposal theoretically and would like to now form a real team – this is also OK. You will then have about 3 hours to identify your research question and structure an interdisciplinary grant proposal in a fictive and uncertain setting facilitated by the board game.

We say “fictive” as there is a “roleplaying element” in the board game that will not only help you break the ice but also be more imaginative and creative. There will be some uncertainty thrown in as well – as it is uncertainty that makes things interesting. While playing the game you will be documenting your process on a live companion app – and towards the end of the workshop you will present your project proposal to your peer teams.

Both seasoned and novice grant writers are invited to join.
